POWERING THE FUTURE: PRECISION FASTENERS FOR WIND ENERGY SOLUTIONS

OCTOBER ISSUE

Clean Energy, Bright Future

Clean energy holds the promise of a bright and sustainable future for our planet.

With the global shift towards sustainability, wind energy has emerged as one of the most promising sources of renewable power. In 2023, wind energy contributed over 837 GW of power worldwide, making up 7% of global electricity generation. India, too, has made significant strides, producing over 43 GW, ranking among the top five countries in wind energy generation.
